The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 8, 9, 11, 17, & 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Windedahl et al 4,628,892.

Windedahl shows a bowstring vibration and noise suppressor having a support 16, attached to a bow limb 13 by means of adhesive 18; and an elastomeric noise suppressor 12 carried by the support, and which contacts the bowstring at 23 when the bowstring is at rest.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, & 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Windedahl.

With regard to claims 5 & 7, the support 17 appears to be made of plastic. However, one may find that aluminum, or a composite material is more durable. With regard to claims 12 & 13, Windedahl shows the suppressor mounted on a compound bow; but one would recognize that this noise suppressor would also be suitable for a cross bow or compound bow. With regard to claims 14-16, Windedahl shows the suppressor 12 as elastomeric, but it is not clear if this is a styrenic thermoplastic. However, one may find through routine experimentation that a styrenic thermoplastic of Shore A hardness of 30 is most suitable.

Claims 2-4, & 10 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened

statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
